

HGS-T2-BK

SEMI-AUTOMATIC ESPRESSO GRINDER

Astra's semi-automatic grinder offers clean, precise and functional design for home, office, or light commercial use. Dial in to coffee perfection with a universal, rotatable coffee tamper and doser fitted with gasket-saver and portafilter positioner. Equipped with a 1.1 lb, unbreakable hopper with coffee chute lock and double collar system, coffee beans are kept away from heat produced by the motor. Easy to use, the adjustable tamper requires a simple 180° turn. A direct intake system protects the longevity of the gaskets while preventing coffee loss as grounds enter the portafilter.

Key Features

- Tempered steel, 60mm grinding burrs
- 1.1lb hopper made of unbreakable and non-deformable material
- Adjustable tamper
- Gasket-saver system prevents the loss of coffee when the product is collected
- Anti-scratch and vibration-free body
- Integrated grounds collection tray
- Single-bodied, hermetically sealed doser
- Maximum operating time: 30 mins

Technical Specs

- Voltage: 110V
- Frequency: 50Hz / 60Hz
- Current: 1.15A
- Power: 270W

Warranty Info

Astra offers its customers a 1 year warranty (within the U.S.) on all grinders. Visit astramfr.com/warranty for more details.
